

Med View

MULTIMODALITY VIEWER

- Many measurement tools
- Image processing
- Burning with an embedded viewer
- Reports
- Windows printing in 100 % zoom

Med view

MED VIEW IS A MULTIMODALITY WORKSTATION WHICH MAIN PURPOSE IS TO VISUALIZE IN A VERY EFFICIENT WAY. ITS USER'S INTERFACE MAKES IT VERY EASY TO USE.

Worklist

The images are received through a Dicom worklist. Our software supports Dicom Store, Print, Push, Query & Retrieve, 10 part...

In order to get to an exam quicker, the user can sort by date, exam, modality, ID...

Image Processing

When the images are loaded in our software, the user has a quick access to the manipulation tools and to the image processing.

Together with the standard tools such as windowing, zoom, shutter, distance and angle measurements (open and Cobb angle), rotations, video invert, the software offers a lot of annotation and drawing possibilities.

In order to meet as best as possible the different requirements, it is for instance possible to draw multi angles for the scoliosis.

Printing, Burning and Reports

It is possible to print on a Windows printer.

You can have a 100% zoom. You do not need a gateway. Everything is included in the software. The user can also write or dictate his reports in Med View.

He will then be able to burn or archive images and report.

Report and archiving

The user can also write or dictate his reports in Med View (option).

He will then be able to burn or archive images and report.

We also have an archiving system which combines security and quickness.

HARDWARE REQUIREMENT

- Bi Core or upper
- 3 GO of ram
- Open GL video board
- Windows 7 Pro
